PROFESSIONAL SUMMARY

Full Stack AI Developer shipping production SaaS features, RESTful APIs, and real-time systems across the MERN and Next.js stack – from schema design to deployed UI. Applies AI/LLM tooling (LangChain, RAG, Agentic AI) to extend product capabilities, and ships fast inside Docker, CI/CD, and microservices-based environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, SCSS, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, JWT, OAuth 2.0, WebSockets, Socket.IO, MVC, Microservices Architecture

Databases: MongoDB, Mongoose, PostgreSQL, Redis, MongoDB Aggregation

AI & LLM: LangChain, Retrieval-Augmented Generation (RAG), Agentic AI, Multi-Agent Systems, Large Language Model (LLM) APIs, Gemini API

DevOps & Tools: Docker, Kubernetes, AWS, CI/CD, Git, GitHub, Vercel, Unit Testing (Jest), Postman, npm

Integrations & CS: Razorpay, ImageKit, Cloudinary | Data Structures & Algorithms (DSA), DBMS, Operating Systems, OOP, Computer Networks

EXPERIENCE

Sharnex

Remote, India

Aug 2026 – Present

AI Full Stack Developer

- Partner directly with the founder to architect a production-grade **Construction ERP** on Next.js, Express, and Prisma – translating business requirements into scalable workflows, REST APIs, and user-facing features.
- Own full-stack delivery end-to-end – backend APIs, business logic, database design, authentication, dashboards, and business-critical calculations – shipping frontend workflows built for real construction operations.
- Shape product and business decisions for an ERP already securing orders from **3 clients**, driving usability, automation, and reliability improvements that cut operational effort for construction teams.

BrightChamps

Remote, India

Apr 2026 – Present

Freelance Coding Instructor

- Deliver 4+ hours of live coding instruction daily to 20+ international students across HTML, CSS, JavaScript, Scratch, and web development fundamentals.
- Design project-based coding curricula and hands-on exercises that translate core programming concepts into practical skills, tracking individual student progress across each course.

PROJECTS

StudyNotion – E-Learning Platform | Live Demo | GitHub

Mar 2025 – Aug 2025

- Engineered a **3-role RBAC platform** (Student, Instructor, Admin) with **5+ courses**, containerized with Docker and deployed to **AWS ECS Fargate** via ECR, secured with HTTPS, IAM & Secrets Manager.
- Optimized MongoDB data access across **12 models** using **50 controlled indexes** and cursor-based pagination, reducing collection scans and keeping high-volume catalog queries bounded.
- Validated reliability with **18 automated tests** and GitHub Actions **CI/CD** checks spanning authentication, course management, protected learning access, and deployment reliability.

BidArena – Real-Time Auction Platform | MERN Stack, Socket.IO, Razorpay | Live Demo

Jul 2026

- Engineered a server-authoritative real-time auction system using Socket.IO, MongoDB transactions, and bid queues to maintain transaction integrity and prevent race conditions and duplicate bids.
- Implemented a fault-tolerant auction lifecycle with automated timers, recovery, winner selection, live presence, chat, and real-time bid tracking.
- Integrated idempotent Razorpay payment processing with server-side signature verification and transactional payment validation for secure auction payments.

EDUCATION

Graphic Era Hill University

Dehradun, Uttarakhand

Aug 2022 – Jun 2026

B.Tech in Computer Science Engineering – CGPA: 7.2

ACHIEVEMENTS & ACTIVITIES

Solved **120+ Data Structures & Algorithms problems** on **LeetCode** across arrays, trees, graphs, and dynamic programming.

Mentor **20+ international students weekly** at BrightChamps, strengthening technical communication, teaching, and problem-solving skills.
